Vitriumsystems™

	FEATURES	BENEFITS
COMPLETE PDF PROTECTION	Transform standard PDF files into secure protectedpdf documents	Prevents piracy of valuable PDF content and misuse of confidential information
PAGE-LEVEL PROTECTION	Secure selected pages within a PDF, leave the rest open for viewing	Provides potential customers with free in-document previews of selected content
IN-DOCUMENT LOGIN FORMS	Design customized in-document login forms with your logos and color schemes	Increases ease of access for authorized readers while maintaining company branding
FULL ADOBE & FOXIT READER COMPATIBILITY	Create protected PDF documents that are fully viewable in Adobe Reader V6.0.1 or higher and Foxit Reader V3.2	Allows readers to seamlessly access protected content without any additional downloads
DOCUMENT AUTO-UNLOCKING	Set documents to auto-unlock when authorized readers re-open them	Maintains a totally seamless document access experience for authorized readers
DYNAMIC READER ACCESS CONTROL	Change reader access to protected PDFs even after a document has been distributed	Retains the PDF owner's control over valuable intellectual property as it circulates online
DIGITAL SHREDDING	Completely revoke reader access to a protected DF even after it has been distributed	Ensures that readers have the most up-to-date version of a PDF and that the publishers retains control over the content
DOCUMENT LOCKDOWN	Create secure PDFs that always travel in their locked form, even after being accessed by a reader	Prevents readers from passing unlocked documents to unauthorized third parties
COMPUTER LOCKDOWN	Limit the number of computers on which a reader may access a secured document	Discourages widespread online sharing of passwords and other login credentials
COPY, PASTE & PRINT CONTROL	Disable text copying and pasting, and document printing	Stops readers from distributing PDF content in hard copies or other electronic formats
DYNAMIC DOCUMENT WATERMARKING	Set documents to display customizable system data when printed or displayed onscreen	Allows publishers to identify which readers are redistributing content and discourage authorized sharing of information
BATCH ENCRYPTION	Protect multiple PDFs simultaneously	Ensures maximum efficiency when protecting large numbers of documents
SINGLE SIGN-ON FAMILIES	Group documents so that a reader who logs in to one can then access the whole group	Increases ease of document access for regular readers
DATA & WORKFLOW INTEGRATION	Integrate Digital Rights Management (DRM) into existing customer databases and document management systems	Maximize the ease of deployment and ongoing operation efficiency of Digital Rights Management (DRM) and PDF protection
AUTOMATIC MULTIPLE DOCUMENT PROCESSING	Protect up to 5 documents per second automatically, with no need to manually upload documents to the protectedpdf server	Increase the ease and speed with which PDF documents are protected
ECOMMERCE & SHOPPING CART INTEGRATION CAPABILITY	The buyer's credentials for purchasing the document are automatically set to be the same as the credentials required to access it	Automate the purchase and transaction process for yourself and your document customers, making it simple and efficient to sell your content online
TRACK DOCUMENTS	Track whenever a PDF document is opened (not just logged into), what PDF viewer and version was used, and the IP address and machine ID	Understand how your PDF documents are being distributed and utilized by your readers
WEB PORTAL SINGLE SIGN-ON	Readers who are signed into your website can access protected documents without having to sign into each document again	Make it easy and efficient for your authorized readers to access your PDF content
WEB SERVICES BASED API TO ACCESS SERVER DATA & SETTINGS	Custom applications can be built to communicate with the protectedpdf server	Customize the functionality of your protectedpdf account to meet the unique needs of your business
